

Multifunctional Nonwovens for Wipes

A new level of flexibility

Discover Hills Nonwoven Technology for your wipes!

We offer multifunctional nonwovens for a variety of wipe applications, from personal hygiene to surface disinfection. Our highly useful, innovative and customisable solutions help you boost market share and brand loyalty.

The wipes market is growing rapidly as consumers are looking for convenience and time savings, which suits their flexible lifestyles. The result is an attractive growth rate with increasing opportunities in developing markets. To take advantage of the growing demand, superior quality and innovative products are necessary. Brands that provide flexibility and new forms of convenience to home users and professionals alike will see a boost in their market share.

Useful wipes that make life more flexible.

**Better Look
and Feeling**

**Customisation
(Mix of Materials)**

**Highly Cost
Efficient**

**High Performance
Compared to
Standard Wipes**

Hills Nonwoven Technology: for maximum usefulness and brand loyalty.

We offer superior quality at every production step: our inline nonwoven technology combines structural strength (spunlaid), liquid absorption (airlaid) and surface haptics (carded) to produce highly effective, easy to use and flexible wipes that set your brand apart.

- **High tensile strength in both MD and CD directions**
- **Narrow MD/CD ratio for multidirectional strength**
- **High pulp content for superior liquid absorption**
- **Enhanced lotion load distribution via three layers absorption technology**
- **Increased surface bulk via hydro-embossing**
- **Added softness or abrasiveness via air-through bonding treatment**

Solutions for a flexible lifestyle.

Consumers are looking for versatile products that help them with their daily routines. We help our clients design products that provide a great experience as well as flexibility that fits modern lifestyles – for maximum brand identification.
